

# Admission requirements

## Admission

Admission to the Master's program is open to students holding at least a Bachelor's degree in electronics or acoustics and who graduated from an internationally recognized university.

Admission is offered to students holding a **B.Sc. (Bachelor of Sciences)** degree which includes training modules in solid mechanics, sound and vibrations, signal processing, acoustics, electronics (at least analog electronics), programming (C language).

In other cases, admission can only be decided after file review of the applicant.

Applicants are expected to read carefully the prerequisite skill requirements of the Master's Program and should be prepared to upgrade their own skills if necessary.

## English Proficiency

All the courses being taught in English only, applicants must prove **English proficiency** (TOEIC Test Level B2 -or equivalent- required) by providing official supporting documents.

Native English-speakers are of course exempt.
