Course coordinator: Christophe Ayrault

Course Description

Aim

The aim is to give the basis of Matlab for audio.

Prerequisite

Matlab refresh

Contents

Time domain computing. This topic is splitted into 2 sessions:

1. Matlab basics and manipulation of sound waves.
2. Sound envelopes and synchronous detection

Frequency domain: Spectral analysis, direct and inverse Fourier transforms, frequency resolution, windowing, spectrograms.

Musical sounds: analysis & synthesis of musical sounds

Mini Project: simulation of a microphone pair recording and writing of flanging effect function.

Examination duration

2 hours

Examination type

Practical exam
