

Seminars

Course information

ECTS: 0	Common with the master in Acoustics	Course code:
Lecture: 10h	Tutorial classes: none	Practical work: none

Course coordinator : Bruno Gazengel

Course Description

Aim

The aim of these seminars is to discover different aspects of scientific and industrial problems in acoustics, electronics, mechanics and electroacoustics.

Contents

Examples of seminars : active control of low-frequency room modes, active absorption with electro-acoustic systems, measurement of vibrations with laser techniques, characterisation of non-linear parameters of loudspeakers, miniature microphones.
