

Objectives

The International Master's Degree in ElectroAcoustics - IMDEA - offers students the possibility to learn the fundamentals in electroacoustics and in related fields.

The program offers a specialized education in:

- * electroacoustics
- * mechanics and materials
- * transducers (loudspeakers, microphones)
- * acoustic loads and acoustic radiation
- * real time signal processing

The master's program prepares students for careers dealing with different aspects of electroacoustics which require strong analytical and research skills, whether in the public or private sectors and for PhD studies or research activities.
