

First year projects

Presentation

Aim of the project

The aim of the first year project is to design a new electroacoustic product or application. The prototype should be ready for mid June to be revealed at the IMDEA Show.

Planning

1. Bibliography, preliminary sketch, first simulations (mid January - mid March)
2. Final sketch, ordering of required components, improved simulations (mid March - mid May)
3. Building, modelling, measuring, listening & optimising the prototype (mid May - mid June)

Past projects

This section presents the different projects done by students during the first year. The reports and/or the presentation are given.

- * 2022 projects [reports and presentations](#)
- * 2021 projects [reports and presentations](#)
- * 2020 projects (during lock down) [reports and presentations](#)
- * 2019 IMDEA show ([reports and presentations](#))
- * 2018 IMDEA show ([reports and presentations](#))
- * 2017 [Portable speaker](#)
- * 2016 [Directive subwoofer](#)
- * 2015 [PVC Loudspeaker](#)
- * 2013 [Link to project](#)
